

Millie micro nano pico

by Tiziana Stoto

Book 7 in which the electrons invite Millie to a party and she is shocked by antimatter

● I wonder what will happen tonight. The electrons always have some surprise for me.

● Hurray. It's time to go!

● Hi guys.
What are we going
to do tonight?

▼▲ Hi Millie. Let's have a party!

● Oh no, please. Not a party! I hate parties. Please, please!

▼ Why Millie?

▲ Parties are fun.

● Not when all the balloons stick to you!

Millie micro nano pico Book 7 is very special: most of the questions Millie asks the electrons in this book were suggested by children who read the previous stories. Here is what they wanted to know:

Do electrons have mums and dads? How are they born?

How old are they? How long do they live for? Do they grow up?

As well as answering these questions, the electrons introduce Millie to static electricity, radioactivity and antimatter.

Many thanks to Danielle, Josh, Mia, Tamzin and Tylah from Raumati Beach School, New Zealand, for helping Millie in this adventure.

Would you like to help Millie too? Send your questions to Millie's website millie.kolorato.com or to Facebook www.facebook/milliemicronanopico. If Millie uses one of your questions in a new story, she will send you a certificate.
